CoffeeNChill - Espresso Recipe Sheet

Staff operational guideline (sample document used for API testing).

Method

1. Purge the group head for two seconds.
2. Dose 18 g of freshly ground house blend into the portafilter.
3. Level and tamp evenly with about 15 kg of pressure.
4. Lock in and start the shot immediately.
5. Extract 36 g of espresso in 25-30 seconds.
6. Wipe the portafilter and purge the steam wand.
